

Is Smartskin® Laser Therapy Right for You?

Did you know that not all lasers are created equally? Your level of results from aesthetic laser therapy is directly tied to the type and quality of laser used, as well as the experience level of the doctor performing the procedure.

That's why at Malibu Canyon Medical Spa, we only use the very best in laser technology. Our most popular aesthetic laser is the Smartskin® Laser by Cynosure®.

Smartskin⁺

The Smartskin+ laser from Cynosure® is the most advanced, customizable micro-ablative Laser Skin Resurfacing workstation available.

Unlike other systems that have 'one-size-fits-all' settings, Smartskin+ provides completely customizable treatment parameters to match our patients' clinical needs and downtime requirements. This flexibility allows Dr. Vesco to fully utilize his over 40 years of experience to give each patient a customized level of treatment.

Fully Customizable Treatments

Smartskin® treatments are completely customized to suite your needs.
